

IT Vocabulary

Part 1

Possessive Nouns

Possessive Nouns

The general rule is that the possessive of a singular noun is formed by adding an apostrophe and 's'. That is, whether the singular noun ends in 's' or not.

Examples:

Lisa's essay.

England's navy.

My brother's girlfriend.

John's last book.

Children's shoes.

Women's clothing.

However, there are 3 exceptions

- 1 A plural noun that already ends in 's' only takes an apostrophe.

The girls' excitement.

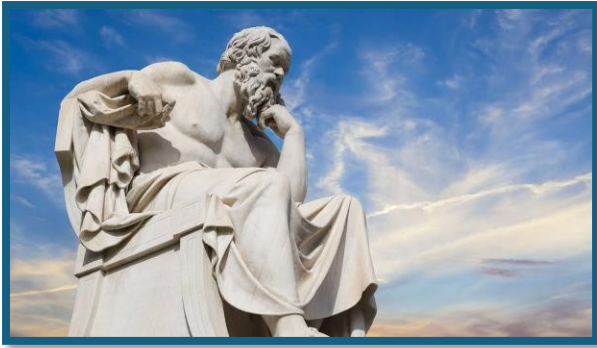

My parents' wedding.

The ladies' room.

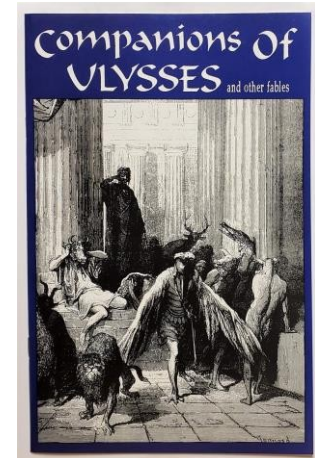

- 2 A name ending in 's' takes only an apostrophe if the possessive form is not pronounced with an extra 's'.

Socrates' philosophy.

Saint Saens' music.

Ulysses' companions.

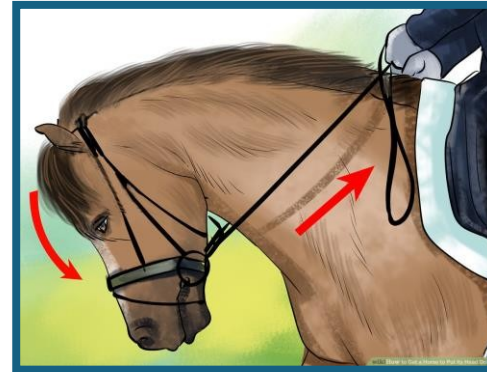

3 The final set of exceptions is pronouns.

He lost his phone.

Which chairs are ours?

The horse lowered its head.

Whose are these glasses?

Practice

Exercise 1.

In this exercise, combine the Owner (a countable person/group) with the Possessed Item (the IT noun) to form a complete phrase.

Example:

The **programmer** has a **bug**. → The **programmer's bug**.

These can be singular or plural, and you can use numbers with them, e.g., *a computer, three servers*

Owner

Possessed Item (Countable Noun)

Possessive Phrase

1. The **server**
2. The **network**
3. My **client**
4. The **system**
5. The **users** (plural)
6. The **company**

- its **license**
- its three **computers**
- his new **application**
- a dangerous **virus**
- their **files**
- its main **database**

- The server's license is new_____
- The network's computers are three_____
- My client's application is new_____
- The system's virus is dangerous _____
- The users' files are saved in the cloud_____
- The company's main database _____

Exercise 2.

Rewriting Sentences with Possessives:

Rewrite the sentence using the possessive form ('s) instead of "the... of the..." structure.

Example:

The **bug** is in the **software** of the **programmer**. → The bug is in the **programmer's software**.

1. The **password** is on the **computer** of the **manager**. → El administrador del ordenador de la contraseña.

2. The **access** is for the **account** of the **user**. → El usuario de la cuenta de Access.

3. The new **server** is for the **department** of the **IT team**. → El nuevo servidor es para el departamento de TI Team.

4. The **problem** is with the **hardware** of the **device**. → El problema reside en el hardware del dispositivo.

5. The **files** are from the **project** of the **team** (plural). → Los archivos del proyecto del equipo

Exercise 3.

Complete the Sentence (Mix & Match)

Choose the best ending for each sentence, making sure the possessive noun makes sense.

- Endings:**
- A.** *a simple **bug***
 - B.** *the company's **information***
 - C.** *the **server's** license*
 - D.** *the team's new **application***

1. We need to check the expiry date of... **C. the server's license**_____.

2. She is in charge of protecting... **B. the company's information**_____.

3. The programmer fixed... **A. A simple bug**_____.

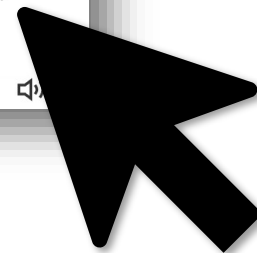

4. We are testing... **D. the team's new application**_____.

Game time

She moved all of...	We cannot lose any of...	We need a replacement for...	The most important thing is protecting...	The new firewall improves...
She has a lot of technical knowledge from...	The team will follow...	Fixing that error will take just five minutes; it's just...	He had to rewrite many lines of...	We checked the storage limit and upgraded...

	...the company's security		...the server's capacity
	...the manager's decision about the new project.		...the network's access
	...a simple bug		...the clients' data
	...his years of experience		...the user's files to a new folder on the desktop.
	...the device's hardware because the screen is broken.		...the programmer's code last night.
